CORE – WEBSITE SCOPE DOCUMENT
Project: Core – Software & Business Solutions
Locations: UK & Dubai

Logo:

1. PROJECT OVERVIEW

Core is a consultancy and product development business focused on improving safety, performance, and human reliability in safety-critical environments.
The website should position Core as a credible, high-level operator, offering both:

- Immediate consulting and advisory services
- Scalable software and system solutions

The site must clearly communicate real-world value, while also introducing a forward-looking product ecosystem led by the Human Performance Engine.

2. OBJECTIVES

The website is designed to:

- Generate consulting enquiries
- Position Core as a trusted advisor in operations and human performance
- Introduce and validate Core products and systems
- Attract pilot partners for early-stage product deployment
- Establish presence across UK and Middle East markets

3. TARGET AUDIENCE

- Directors and senior decision-makers in:
    - Rail and Infrastructure
    - Construction
    - Aviation
    - Healthcare
    - Transport
    - Energy and Industrial sectors
- Organisations operating in:
    - Safety-critical environments
    - Complex or high-risk operations
    - UK and Middle East regions

4. WEBSITE STRUCTURE

4.1 HOMEPAGE

Purpose:
To clearly communicate value, build credibility, and drive enquiries.
Sections:
Hero Section

- Headline: Optimising human performance in safety-critical operations
- Subheading: Consulting and intelligent systems for safety and performance
- Call to Actions:
    - Request Consultation
    - Become a Pilot Partner

What You Can Get From Core

- Continuous Improvement Programmes
- ISO 9001 / 14001 / 45001 Readiness
- Audits and Reviews
- Human Factors Analysis
- Competency and Training Systems
- Fatigue and Risk Management

Core Offerings

- Consulting and Advisory
- Software and Systems

Featured Products

- Human Performance Engine
- Smart Safety & Performance Station
- Environmental Risk & Sand Mitigation System

Pilot Partner Section

- Explanation of pilot programme
- Benefits:
    - Early access
    - Preferred commercial terms
    - Influence on development
- CTA: Apply to Become a Pilot Partner

Why Core

- Real-world operational experience
- Built for safety-critical industries
- Focus on measurable results

4.2 ABOUT PAGE
Sections:
Core Overview

- Consultancy and product business
- Focus on human performance and operational excellence

Founder Profile (Darryl)

- Director-level leadership experience
- Middle East project turnaround experience
- Expertise in operations, planning, and performance
- MBA (strategic focus)
- Multiple National recognised Innovation Winner

Partner (Will)

- Strategic partner supporting growth and development
- Former PWC
- CFO
- Angel Investor
- Proven portfolio of SaaS businesses

UK & Dubai Presence

- Operating across both regions
- Experience in diverse operational environments

4.3 SERVICES PAGE

Purpose:
Primary revenue driver – must clearly show value and capability.

Human Factors & Performance
- Fatigue and cognitive load
- Human reliability
- Behavioural safety
- Task-based risk

ISO & Compliance
- ISO 9001, 14001, 45001
- Gap analysis
- Implementation support

Audits & Reviews
- Operational audits
- Safety inspections
- Performance diagnostics

Continuous Improvement
- Lean-based improvements
- KPI frameworks
- Process optimisation

Competency & Training
- Competency frameworks
- Skill tracking
- Training programme development

Specialist Advisory
- Fatigue risk management
- Planning and resource strategy
- High-risk operations support
- Middle East operations

4.4 PRODUCTS PAGE

Human Performance Engine (Flagship)
A modular system designed to optimise workforce performance in safety-critical environments.
Modules:
- Current Phase:
    - Fatigue Management
    - Competency Management
- Future Phase:
    - Resource Planning
    - Performance Analytics
    - Document Management Systems
    - Asset Management Systems

Deployment Status
- Entering pilot phase
- Seeking pilot partners in UK and Dubai
- Preferred commercial terms available

Smart Safety & Performance Station
- Depot/site interface
- Digital sign-in

- Safety briefings and documents
- Live KPIs
- Biometrics

Environmental Risk & Sand Mitigation System

- Wind and weather monitoring
- Sand risk analysis
- Early warning alerts
- Designed for desert infrastructure environments

Bespoke Systems

- Custom-built solutions based on client & environmental needs

4.5 CASE STUDIES

Format:

- Challenge
- Action
- Result

Examples:

- Middle East rail project turnaround
- Operational performance improvement
- Safety and human performance enhancement

4.6 CONTACT PAGE

Features:

- Contact form
- Email
- Phone
- LinkedIn

Enquiry Type Dropdown:

- Consulting / Advisory
- ISO / Audit
- Human Factors
- Pilot Partner
- Product Enquiry
- General

5. DESIGN REQUIREMENTS

- Clean, modern, premium feel
- Minimalist layout
- Strong typography
- Industrial / infrastructure visual tone
- Subtle animations
- Mobile-first design

6. FUNCTIONAL REQUIREMENTS

- Contact form with enquiry categorisation
- Clear call-to-actions across all pages
- Easy navigation
- Fast load speed
- SEO-ready structure

7. CONTENT PRINCIPLES

- Clear and concise messaging
- Focus on value and outcomes

- Avoid overly technical language
- Maintain a professional and credible tone

8. FUTURE SCALABILITY
The website should allow for:
- Additional product pages
- Case study expansion
- Blog or insights section
- Potential client portal integration

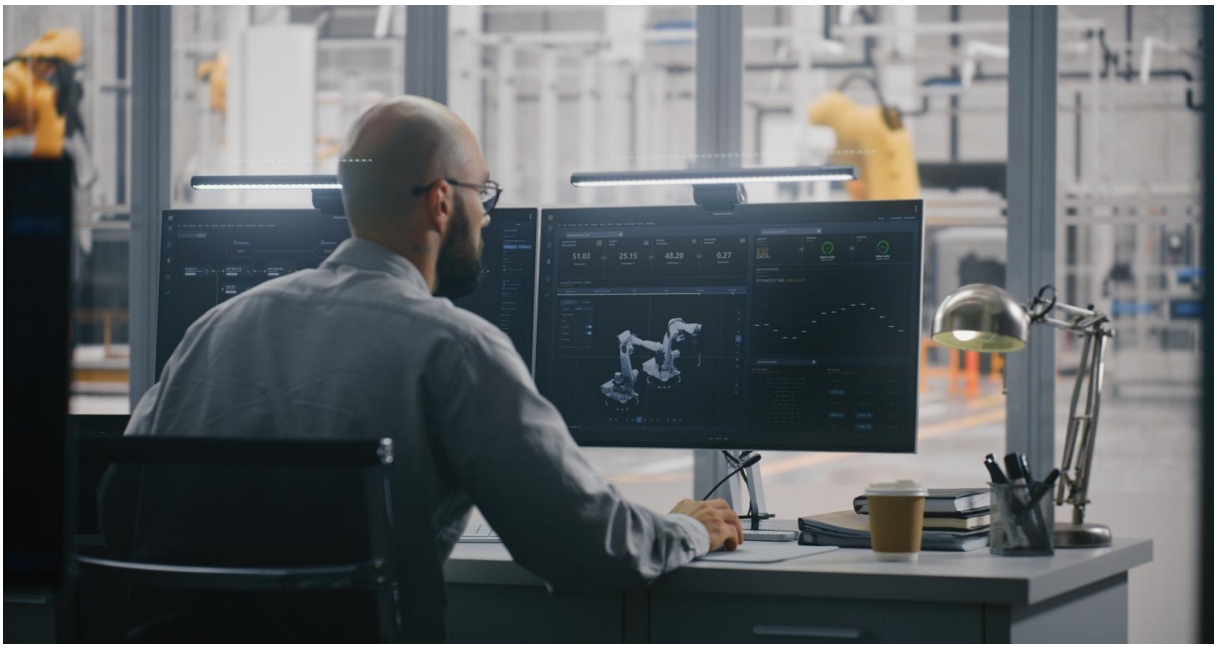
9. POSITIONING STATEMENT
Core should be presented as:
A high-level consultancy and technology business focused on optimising human performance in safety-critical operations.

---

1. HOMEPAGE COPY

HERO SECTION

Proven delivery across complex infrastructure environments, including major rail operations in the Middle East.



5

Headline

Optimising Human Performance in Safety-Critical Operations

Subheading

Consulting and intelligent systems designed to improve safety, performance, and operational reliability across complex environments.

CTA Buttons

- Request a Consultation
- Become a Pilot Partner

SECTION 2 – WHAT YOU CAN GET FROM CORE

Headline

Practical Support. Measurable Results.

Core provides specialist consulting and performance solutions designed to deliver immediate impact across safety-critical operations.

Services (Bullet Style)

- Continuous Improvement Programmes
- ISO 9001, 14001 & 45001 Readiness
- Operational Audits & Reviews
- Human Factors & Performance Analysis
- Competency & Training Systems
- Fatigue & Risk Management

SECTION 3 – HOW CORE WORKS

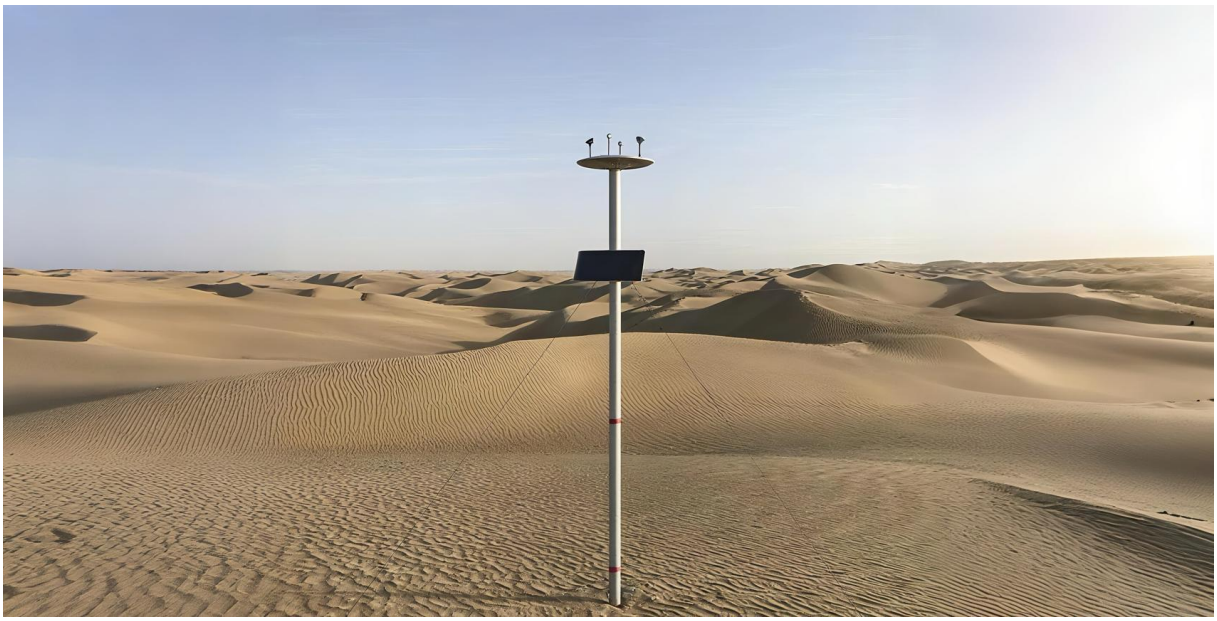
Headline

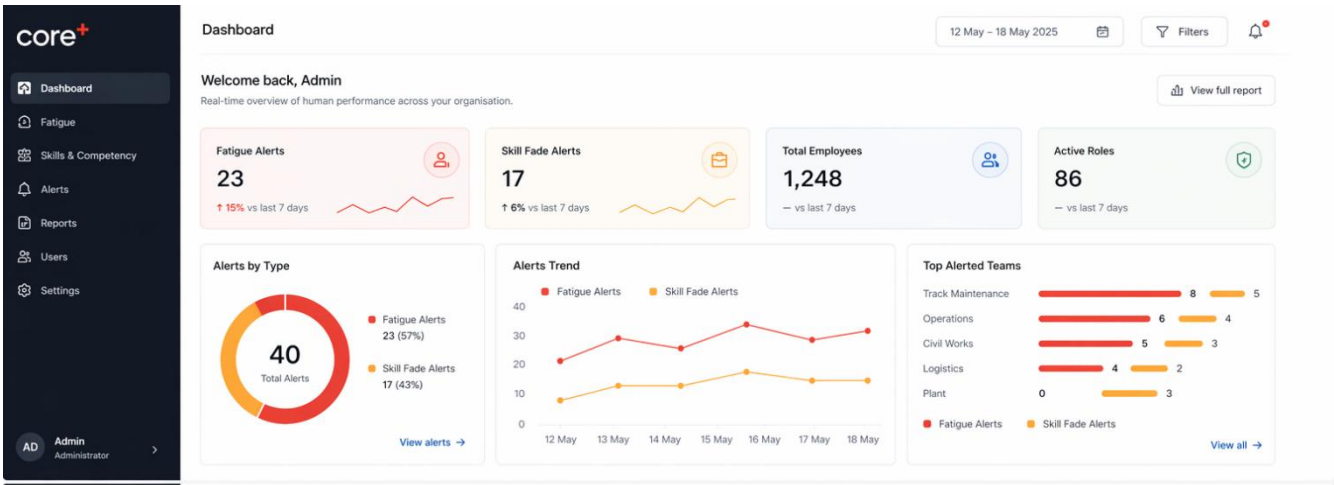
Consulting Expertise. Built for Real Operations.

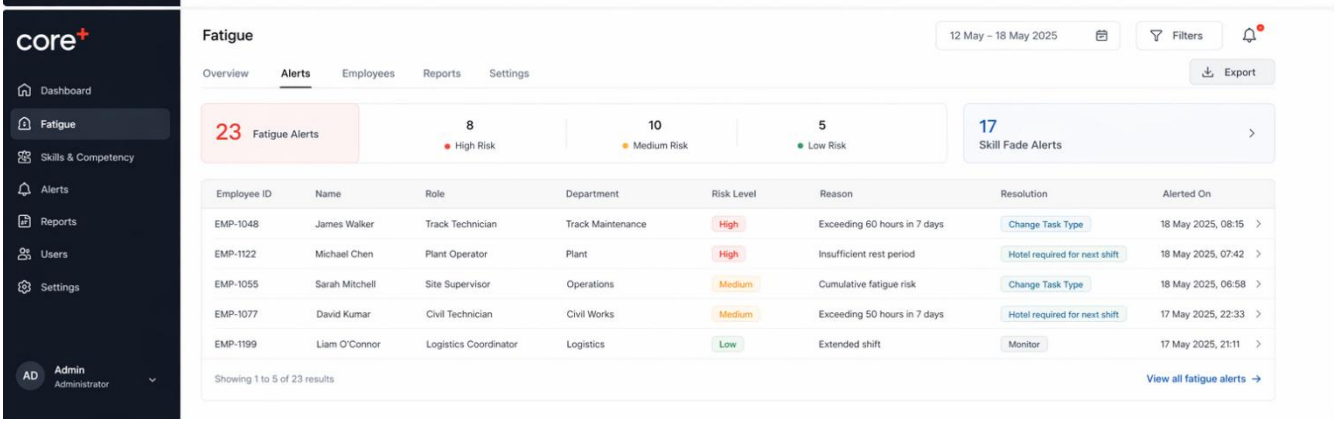
Core combines real-world operational experience with data-driven thinking to improve how organisations plan, manage, and deliver work.

From frontline operations to strategic leadership, our approach focuses on aligning people, performance, and systems.

SECTION 4 – CORE SYSTEMS







Headline

Building the Future of Human Performance

Core is developing a modular suite of systems designed to transform how organisations manage workforce performance and risk.

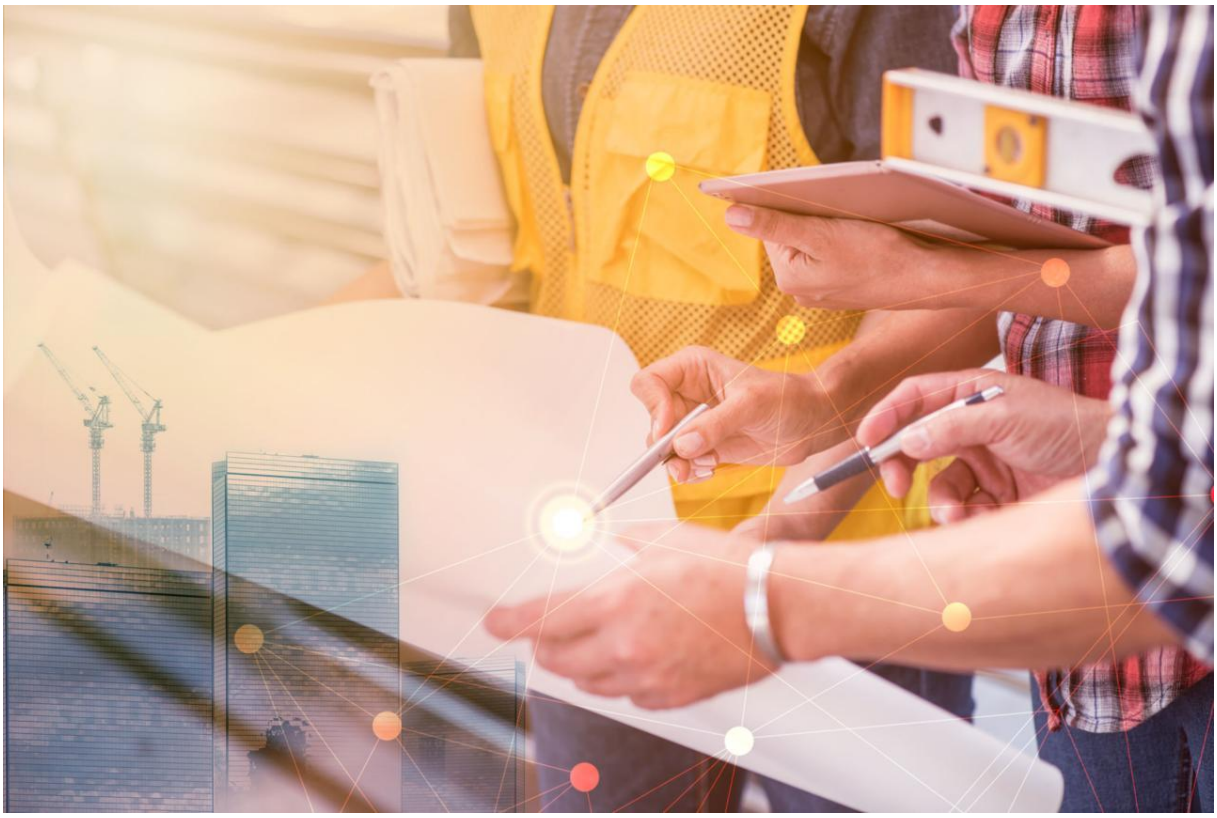
Highlight – Human Performance Engine

A next-generation system combining fatigue, competency, and performance data into one intelligent platform.

Other Systems

- Smart Safety & Performance Station
- Environmental Risk & Sand Mitigation System

SECTION 5 – PILOT PARTNERS (VERY IMPORTANT)



Now Onboarding Pilot Partners (UK & Dubai)

Pilot Partner Programme

Core is currently onboarding a limited number of pilot partners across the UK and Middle East to support the first phase deployment of the Human Performance Engine.

This programme is designed for organisations looking to take a proactive approach to improving safety, workforce performance, and operational efficiency through data-driven systems.

Pilot partners will work directly with Core during early-stage implementation, helping shape the system while gaining immediate operational value.

What the Pilot Programme Involves

- **Initial operational review and alignment**
- **Configuration of core modules (fatigue, competency, performance)**
- **Integration with existing processes where possible**
- **Ongoing refinement based on real-world use**
- **Direct collaboration with Core during development**

Key Benefits

Early Access

Be among the first organisations to implement a next-generation human performance system before wider market release.

Preferred Commercial Terms

Pilot partners will receive favourable commercial arrangements in recognition of early adoption and collaboration.

Influence on Development

Direct input into system functionality, ensuring alignment with real operational challenges and requirements.

Tailored Implementation

The system will be adapted to your specific operational environment, rather than a one-size-fits-all approach.

Strategic Advantage

Gain early insight into workforce performance trends, risk exposure, and optimisation opportunities ahead of competitors.

Ideal Pilot Partner Profile

We are looking to partner with organisations that:

- **Operate in safety-critical or high-risk environments**
- **Are open to innovation and system-based improvement**
- **Have a focus on performance, safety, and efficiency**
- **Can commit to collaboration during the pilot phase**

Engagement Approach

Pilot partnerships will be structured on a collaborative basis, with defined objectives, timelines, and review points to ensure measurable outcomes.

Call to Action

Apply to Become a Pilot Partner
or
Request an Initial Discussion

SECTION 6 – WHY CORE

Built on Experience. Designed for Impact.

Points

- Director-level operational experience
- Proven track record in complex project environments
- Deep expertise in human factors and performance
- Focused on practical, measurable improvements

FINAL CTA SECTION

Start the Conversation

Whether you're looking to improve performance, prepare for audit, or explore new systems, Core can support your operation.
